-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 March 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Rejections withdrawn

1. Claim 1 is rejected under 35 USC 102(b) as being anticipated by Auttersen in view of the amendment filed on March 21, 2005.
2. Claim 3 is rejected under 35 USC 102(b) as being anticipated by Rasmussen in view of the amendment.
3. Claim 2 is rejected under 35 USC 103(a) as being unpatentable over Auttersen in view of the amendment.
4. Claim 4 is rejected under 35 USC 103(a) as being unpatentable over Rasmussen in view of the amendment.

Response to Arguments

5. Applicant's arguments with respect to claims 1-4 and newly submitted claims 7-16 have been considered but are moot in view of the new ground(s) of rejection.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761

Art Unit: 1772

(CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1-4 and 7-16 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of copending Application No. 10/612,087. Although the conflicting claims are not identical, they are not patentably distinct from each other because both the instant application and the co-pending application are directed to a laminate comprising a release sheet, an adhesive layer formed on the sheet, a base material formed on the adhesive layer, and a protective material provided on a portion of the base material that corresponds to a portion other than the principally used portion of the adhesive layer. However, co-pending Application'087 fails to recite in the claims that the adhesive sheet is in continuous contact and coextensive with the release sheet, the base material is in continuous contact and coextensive with the adhesive sheet, and that the protective sheet is in continuous contact with the base material . It would have been obvious to one having ordinary skill in the art to provide the claimed laminate of Application'511 to have the release sheet in continuous contact and coextensive with the adhesive layer, the base layer being in continuous contact and coextensive with the adhesive layer, and the protective layer being in continuous contact with the base layer because it is shown in figure-1c therein.

Art Unit: 1772

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

8. The prior art uncovered so far fails to teach or suggest the laminate sheet comprising a long release sheet, an adhesive layer in continuous contact and coextensive with the release sheet, a base material in continuous contact and coextensive with the adhesive sheet and a protective member is provided longitudinally on and in continuous contact with a generally peripheral portion of the second surface of the base material.
